

To Whom it May Concern,

I am a graphic design professional, mostly designing for the web. I have worked as a contractor for the Jet Propulsion Laboratory (JPL) for **27 years**.

In those years I have been privileged to work on many of NASA's most popular websites, including all of the websites for the Mars Exploration Program, the Solar System Exploration website, and the Cassini Solstice Mission website – which has won **3 WEBBY awards**, due to the site architecture and the design work of our Raytheon Web Solutions group. I have worked on presentation graphics, countless websites, presentation booth designs, mission publicity images, lithographs, folders, posters, pamphlets, bookmarks, lenticular postcards, interactive applications, 3D modeling, texturing and animation, video for the web, parallax and responsive web design, WordPress websites, proposal graphics and I have even re-designed a full hallway to present the work done by one of our many clients.

Most of my work can be seen worldwide - on the web, in print, and on television. I am an expert in **Photoshop, Illustrator, inDesign**, and **Lightwave 3d**, and I am proficient in **WordPress** and **Figma**. I am comfortable working closely with clients to bring their projects to fruition.

I am looking forward to meeting with you to learn much more about your graphic design needs, and to see how my skills can best serve you. Take a look at my resume' and view my portfolio at <http://crimzon5.wix.com/randiioleiver> to see if you think I would be a good fit for you. Please contact me to set up an interview. I am looking forward to being a member of your design team.

Sincerely,

Randall E. Oliver (Randii Oliver)

ABOUT ME

OVER **27** YEARS
experience

...as a senior graphic designer, creating public education and promotional products for high profile JPL and NASA projects, including Mars Public Outreach, the Cassini Solstice Mission, and the Solar System Exploration Program.

3 WEBBYS

I am a founding member of the Raytheon Web Solutions Group, which has won 3 WEBBY Awards.

FAMOUS

My artwork is seen worldwide on the web, in print, and even on television. Some of my 3D models of phytoplankton were turned into glass sculptures for the Institute of Oceanography in NhaTrang, Vietnam.

some of my clients are:

EARTH
PREDICTION
INNOVATION
CENTER

EDUCATION

MA – 1996 Graphic Design **Cal. State LA**

BA – 1982 Studio Art U. C. **Santa Cruz**
